

STONIUM

S I M P L E U P G R A D E S

About Us.

If you're a business owner or a homeowner looking to upgrade the interior facilities of your space, then Stonium is exactly what you need to elevate the look and feel of any kitchen or bathroom.

Founded in 2014 by brothers Jad and Charbel Rizk, the company offers a wide variety of high-end, durable, quality products made from US and Russian technologies and materials, in order to keep you up with the latest trend within the right budget.

Team Work

We provide timely delivery for all your needs and a dedicated customer service team for support, along with frequent updates to our products by providing you with the latest carefully-selected designs, each created to meet the needs of your brand or home.

And keeping in line with the latest industry trends, we are always on the lookout for the newest models, colors, designs, and fashion needs to match your very own.

STONIUM

“

We make some tests stand out to emphasize the big point.

Our Concrete

Using Ultra High Performance Concrete (UHPC) in all we produce, Stonium's selection has a very high-density and surpasses all laboratory testing, with very minimal pores that are unlike any other concrete on the market.

Due to years of collective experience, research, and experimentation, Stonium has created a line of products that boast absorption levels nearing zero and ultra-reliability for long-term use.

The Founders.

Meet Charbel Rizk, the ultimate perfectionist, and technical mind behind Stonium's products. With a love for production,

organization, and a total eye for all things involving attention to detail, Charbel never settles for less than absolute perfection.

With a degree in Industrial Engineering from the Lebanese American University (LAU), he went on to study concrete technology in the United States and Russia at two highly esteemed and reputable institutions.

Taking over the family business in the production of natural stone manufacturing since 2009, he used both his experience and knowledge regarding stone and concrete technology to create the Stonium formula.

Charbel Rizk

STONIUM

Jad Rizk

The Founders.

We've met the technical side of the duo with Charbel Rizk, and here we come to the strategic side with his brother, Jad Rizk.

As a business marketing graduate from Notre Dame University (NDU), Jad seeks to find new solutions to everyday problems in the industry.

His many years of experience studying natural stones – and the designs that suit them best – have helped him in matching the right colors and textures to essential daily household products that best suit the needs of not just the market itself, but clients of all kinds.

Along with his brother Charbel, Jad took a leadership role in the family business since 2010 through the managing, marketing, and sales of Stonium, much in part due to his education in Russia regarding concrete trends and technologies.

TOP MOUNT BASINS

Basic Series

Technical Sheets & Projects

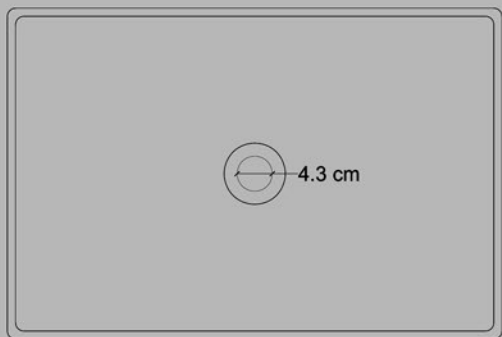

The Recta.

Sharp, sleek, and absolutely powerful to look at.
A product that is no-nonsense for those who wish to
add a touch of their own straight-forward personality.

* Concrete casting is a handmade process, therefore a margin of variation can be found from one piece to another in terms of color, leveling, and aggregates dispersion/denseness. The casting process may result in some minor pinholes, light scratches, and color lines that show on the surface of concrete.

STONIUM

“

*When no one else believed in the smoke blue
Recta, we did.*

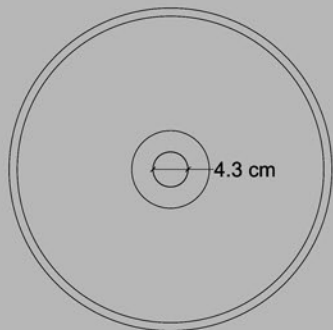

The Rondo.

The twin brother of Recta, here we see the simpler side of life. This is a wash basin with a more playful side for those who take "laid back" to the next level.

CERTIFICATE OF TEST

Requested by **Stonium
LEBANON** Date **08/09/2022**
Your Ref.
Our Ref. **R- 31023**

Nature of Test

Tests on "Ultra High Performance Concrete" sample.

1. Absorption Capacity and Density ASTM C 97			
Sample Designation	Dimension cm	Absorption Capacity Percent by Weight	Density Kg/m ³ (Pcf)
Ultra High Performance Concrete	5.0x5.0x5.0	0.40	2384 (148.82)
2. Flexural Strength ASTM C 880			
Sample Designation	Flexural Strength MPa (Psi)		
Dimension Ultra High Performance Concrete	12.6 (1827.4)		
3. Compressive Strength C 170			
Sample Designation	Dimension cm	Compressive Strength Mpa (Psi)	
Ultra High Performance Concrete	5.0x5.0x5.0	60.0 (8702.0)	
4. Abrasion Resistance Using Tinius Olsen Wearometer C.D.R.			
Sample Designation	Loss in Thickness After 1000 Revolutions mm (inch)		
Ultra High Performance Concrete	0.25 (0.01)		

for *Salah Sadek*
Salah Sadek, Ph.D.
Professor of Civil & Environmental Engineering

Our concrete has been tested in the American University of Beirut (AUB) to ensure and certify that our products are heavy duty and meet all international standards.

Using Ultra High Performance Concrete (UHPC) in all we produce, Stonium's selection has a very high-density and surpasses all laboratory testing, with very minimal absorption and pores that are unlike any other concrete products on the market.
